

## **Individual Items to Note (1040)**

### **Items to Note**

Please give special attention to the following details about certain 1040 carryover information that will be captured to build the ProSeries client files used for transfer to the 2008 ProSeries Tax program. These items should be noted due to capture limitations within the Great Tax Individual module.

- Amounts that are calculated from user input and flow directly to the tax forms can not be captured. This would include carryovers and prior year summary information.
- The following items can NOT be converted from Great Tax, and may require manual entries in the converted files.
  - Accumulated depreciation
  - Prior year Section 179 expense
  - Carryover amounts, such as credit carryovers.
  - Data on F6 detail fields. (Totals are converted from these fields, but not the detail).
- Close attention should be paid to the items in the following list. These are the items that will be captured for the ProSeries client files, but are not necessarily a complete list of items that should be carried-over.
- One digit alpha characters, such as the Taxpayer/Spouse indicator (T/S) MUST be entered in upper case in order to convert.

Because of the capture limitations in the program being converted from, review of each client file to ensure completeness is necessary. Our goal is to reduce manual entry of data and information as much as possible.

## Partnership Items to Note (1065)

### Items to Note

Please give special attention to the following details about certain 1065 carryover information that will be captured to build the ProSeries client files used for transfer to the 2008 ProSeries Tax program. These items should be noted due to capture limitations within the Great Tax Individual module.

- Amounts that are calculated from user input and flow directly to the tax forms can not be captured. This would include carryovers and prior year summary information.
- The following items can NOT be converted from Great Tax, and may require manual entries in the converted files.
  - Accumulated depreciation
  - Prior year Section 179 expense
  - Carryover amounts, such as credit carryovers.
  - Data on F6 detail fields. (Totals are converted from these fields, but not the detail).
- Close attention should be paid to the items in the following list that are *CAPITALIZED / ITALICIZED*. These are the items that will be captured for the ProSeries client files, but are not necessarily a complete list of items that should be carried-over.
- One digit alphabetic codes, such as the codes in the passthrough K-1 screens, **MUST** be entered in upper case in order to convert.

Because of the capture limitations in the program being converted from, review of each client file to ensure completeness is necessary. Our goal is to reduce manual entry of data and information as much as possible.

## S Corporation Items to Note (1120S)

### Items to Note

Please give special attention to the following details about certain 1120S carryover information that will be captured to build the ProSeries client files used for transfer to the 2008 ProSeries Tax program. These items should be noted due to capture limitations within the Great Tax Individual module.

- Amounts that are calculated from user input and flow directly to the tax forms can not be captured. This would include carryovers and prior year summary information.
- The following items can NOT be converted from Great Tax, and may require manual entries in the converted files.
  - Accumulated depreciation
  - Prior year Section 179 expense
  - Carryover amounts, such as credit carryovers.
  - Data on F6 detail fields. (Totals are converted from these fields, but not the detail).
- Close attention should be paid to the items in the following list that are *CAPITALIZED / ITALICIZED*. These are the items that will be captured for the ProSeries client files, but are not necessarily a complete list of items that should be carried-over.
- One digit alphabetic codes, such as the codes in the passthrough K-1 screens, **MUST** be entered in upper case entries in order to convert.

Because of the capture limitations in the program being converted from, review of each client file to ensure completeness is necessary. Our goal is to reduce manual entry of data and information as much as possible.
